

## **Deco-Prep “Adhesive Primer for Difficult Substrates”**

### **Description-**

- Deco-Prep offers unique adhesion to nearly all non-porous substrates. This technically advanced product expands the ability to use Decoplast adhesive based systems where previous substrate concerns existed.

### **Preparation**

- The surface should be clean and free of any contaminates.
- The surface and air temperature will be at a minimum of 45°F during and at least 24 hours after the application.

### **Mixing**

- Deco-Prep is a pre-blended compound to be used directly from its factory sealed container. If necessary, minimal site mixing should be done to achieve uniform consistency.

### **Application**

- Deco-Prep can be applied by roller or brush. At a rate of 18 mils, Deco-Prep should be applied evenly and let stand until dry. Upon being fully cured any Decoplast adhesive coating may be used to adhere Decoplast EPS foam to the approved substrate.

### **Substrates**

- Glazed Brick
- Metal Substrates
- Concreted Substrates and Walls
- Old Alkyd Resin Paints
- Various Plastics

## Cleaning

- Clean equipment and containers with water immediately after use.

## Cautions

- Protect work from freezing.
- Contains Portland cement and silica.
- Avoid inhaling dust.
- Handle with care.
- Consult the manufacturer's Material
- Data Safety Sheets.

## Availability

- Deco-Prep "Adhesive Primer for Difficult Substrates" is available only at authorized Decoplast distributors.

## Warranty

- Consult your nearest Decoplast professional for details.
